TEST PARTICIPANTS REWARDS	6 Months	12 Months
AFFLARIUM NFT HOLDERS	3 Months	6 Months

Economy Token

The economy token is a means of payment in Afflarium

The economy token is used for:

- Commerce.
- Trade of property, assets, and artifacts. in other words, NFTs.
- Receiving and paying salaries and rent within Afflarium.
- Payment for services within Afflarium.

Economic tokens in Afflarium currently are:

- \$USDC token of Circle and Coinbase company
- \$USDT token of Tether company

Why is that? It's very simple: We want the value of assets and artifacts in Afflarium to depend on the Afflarium users themselves, not on the price volatility of the economy token.

Therefore, stablecoins act as such.

In the future, we plan to release our own stablecoin, which will be fully backed by assets of equivalent value.
